## **Controls Engineer**

### **Company**

Sweeney Controls is an established, stable and growing company based in Fargo, North Dakota. Sweeney Controls designs, programs, builds, and maintains automated control systems. We implement control systems and integration services for the food, beverage, water, wastewater, grain elevator and material handling industries.

### **Job Description**

We are seeking a Controls Engineer. Responsibilities of this position include, but are not limited to the development of Programmable Logic Controller (PLC) programs, Graphical User Interface (GUI) screens and report (Excel, Access and Proprietary software) programs. Programming will include relay ladder logic, sequential function chart, function block, structured text and VBA.

This position will also involve working with process concepts, schematics, and will require some travel.

#### **Primary Responsibilities:**

- Development of PLC and GUI screens from:
  - Allen-Bradley
  - General Electric
  - Modicon
- Assist in project development.
- Onsite and offsite support for projects.

### **Qualifications**

- BS degree in electrical or computer engineering.
- Experience in Water/Wastewater control systems.
- Excellent problem solving skills.
- Excellent organizational and analytical skills.
- Preferred candidate will have EIT (FE) certification or be a Registered Professional Engineer.

### **Benefits**

Sweeney Controls Company offers a competitive salary and benefits package including: paid holidays, overtime, paid time off, medical, 401(k), and paid training time.
