## **Control Panel Technician**

### **Company**

Sweeney Controls is an established, stable and growing company based in Fargo, North Dakota. Sweeney Controls designs, programs, builds, and maintains automated control systems. We implement control systems and integration services for the food, beverage, water, wastewater, grain elevator and material handling industries.

### **Job Description**

We are seeking a Control Panel Technician. This position is responsible for the building, troubleshooting and testing of electrical control panels. Experience with variable frequency drives, reduce voltage starters, motor starters and PLCs a plus. Occasional travel is within ND, SD and MN with some overnight stays is required

#### Primary Responsibilities:

- Reading schematics and dimensioning layouts
- Drilling, tapping, punching and mounting components to panels
- Point to point wiring of internal panel components such as PLCs, relays, motor starters, reduced voltage starters and VFDs
- Use of DMM to confirm wiring

#### Additional Responsibilities

- Downloading programs to VFDs, PLCs and Operator Interfaces and assisting in functional verification
- Setup and testing of finished control panels
- On-Site control panel construction

### **Qualifications**

- 2 year associate degree in Electrical or Electronic Technology or experience in control panel construction.
- Have a high quality of standard and pay close attention to detail
- Good mechanical aptitude
- Ability to work as part of a team

### **Benefits**

Sweeney Controls Company offers a competitive salary and benefits package including: paid holidays, overtime, paid time off, medical, 401(k), and paid training time.
